IT'S TIME FOR A BETTER TARGET[®]

Targets Online™ specializes in military training, qualification and law enforcement targets. Whether you work in the field of law enforcement, military, security or any other related area, we can fulfill all of your target needs.

Product development and testing is a key area of focus for Targets Online. We consult with a network of firearms experts to bring you the latest in target innovations. Our products reflect our strong commitment to the safety and security of those working in all aspects of public safety.

Reinforcing our quality philosophy, the high quality materials we use for our targets are more than twice the thickness of normal target paper. As a result, they are more resistant to tearing, will hold up better in a variety of weather conditions and ultimately will last longer, making them a cost effective solution. In addition, individual scores are easier to identify when there are multiple shots in a tight pattern.

While we offer stock targets, Targets Online can also develop a custom target based upon your specific needs. If you don't see an existing target that will meet your needs, simply send us your specifications, photos or design and we'll custom produce a target just for you.

For more information about Targets Online's stock or custom targets, call 1-877-505-4079 or e-mail info@targetsonline.com

Targets Online is the inventor of an Electronic Control Device target that has become the preferred target of TASER® International. This life sized, full body target emulates the sound of an ECD contact with the human body, greatly assisting in law enforcement training. We have applied for a patent on this product and are the sole manufacturer. This product is a testament to our ingenuity and perseverance in the product development.

In 2009 we were presented with a dilemma by a TASER® Senior Master Instructor. They did not have an effective training target and the most common alternative was household aluminum foil. This was a difficult and time consuming process using materials barely suitable for the task. We went to work testing several materials and production methods, arriving at the most cost effective solution. For the final touch, we introduced a realistic human body shape printed with a life sized photographic image. The finished product was presented to TASER® International and we received a purchase order. Our target is now the exclusive training target at all instructor training courses.

The idea for this remarkable innovation began with two brothers talking in a garage. One is a TASER® Senior Master Instructor. The other has nearly 30 years experience in the printing industry. This idea was made possible by an owner and management team at Targets Online willing to spend the time and money on research and development. We took the invention from concept to finished product in a matter a few short months. The success of this new ECD target is just one example of the commitment to innovation by the entire team at Targets Online.

The ECD target back has a metallic coating applied to allow proper conductivity. This coating was designed to reproduce the sound created when both probes contact the human body.

TASER® is a trademark of TASER International, Inc.

CARD STOCK TARGETS[®]

These targets are more than twice the thickness of a normal paper target. However, thicker paper alone is not what makes our targets better than the competition. Our paper also has binding material incorporated into the wood fibers, dramatically increasing its strength and durability. As a result, our targets reduce the natural tendency of paper fibers to explode outward when struck with a bullet. The binding material helps hold the shape of the bullets impact, making it easier to identify every shot in a tight pattern.

Part #7250016

At Targets Online we understand budget constraints and strive to bring you better value for your training dollar. That is the driving force behind our latest innovations, the TAC DROP UTC Front and TAC DROP UTC 3D cardboard target. We designed it to be simple and cost effective and think you will agree.

Our new TAC DROP UTC cardboard targets are based on a standard cardboard silhouette cutout. Rectangular perforations of 8½" X 11" and 4" X 6" were added for the upper thoracic cavity and an inverted triangle perforation designates the upper facial region. We took two inches from the bottom of the torso and added it at the top of the head to accommodate mounting clamps. The most noticeable changes are the tab slots near the side edges of the torso and head. This target is fully functional as a standalone silhouette target or to hang a shirt on. But we didn't stop there. Now you can attach our new TAC DROP UTC 3D cardboard to the tab slots on the TAC DROP UTC front and have a full three dimensional target. It will hold a shirt and give you a 3D that can be fired on from any attack angle.

Our TAC DROP UTC 3D cardboard target folds down to the same size as the TAC DROP UTC front and they are sold separately. You do not have to order them as a set or order the same amount of each piece. Mix and match these items on your order.

CARDBOARD BACKERS

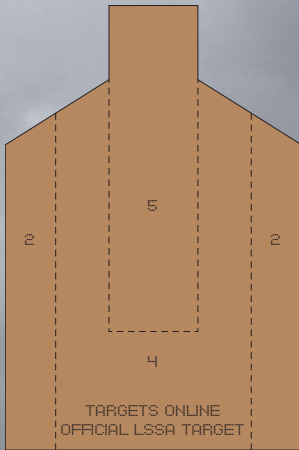

Cardboard target backers are made from corrugated material. This material is a commodity that can have extreme fluctuations in pricing. Our cardboard backer prices are very competitive. We strive to be at or below our competitors prices. Call us or check our website for current pricing on cardboard backers.

TARGET OVERLAYS

Our overlays are designed to give you flexibility in split second decision making scenarios. They are printed from an exact cutout of the weapon area to make the substitution unrecognizable. These overlays can be applied with ordinary spray adhesive.

CUSTOM TARGETS

We understand that agency and departmental regulations may require various designs and targeting zones. Targets Online can develop custom targets for you based upon your specific needs. If you don't see one of our existing targets that will meet your needs, simply send us your specifications, photos or design and we'll custom produce a target just for you. We have a professional photographer and graphic artists on our staff to help make your concept a reality. In most cases, we can reduce your cost per piece to lower than a stock target on orders of 2,000 or more.

DON'T SEE IT HERE? JUST ASK

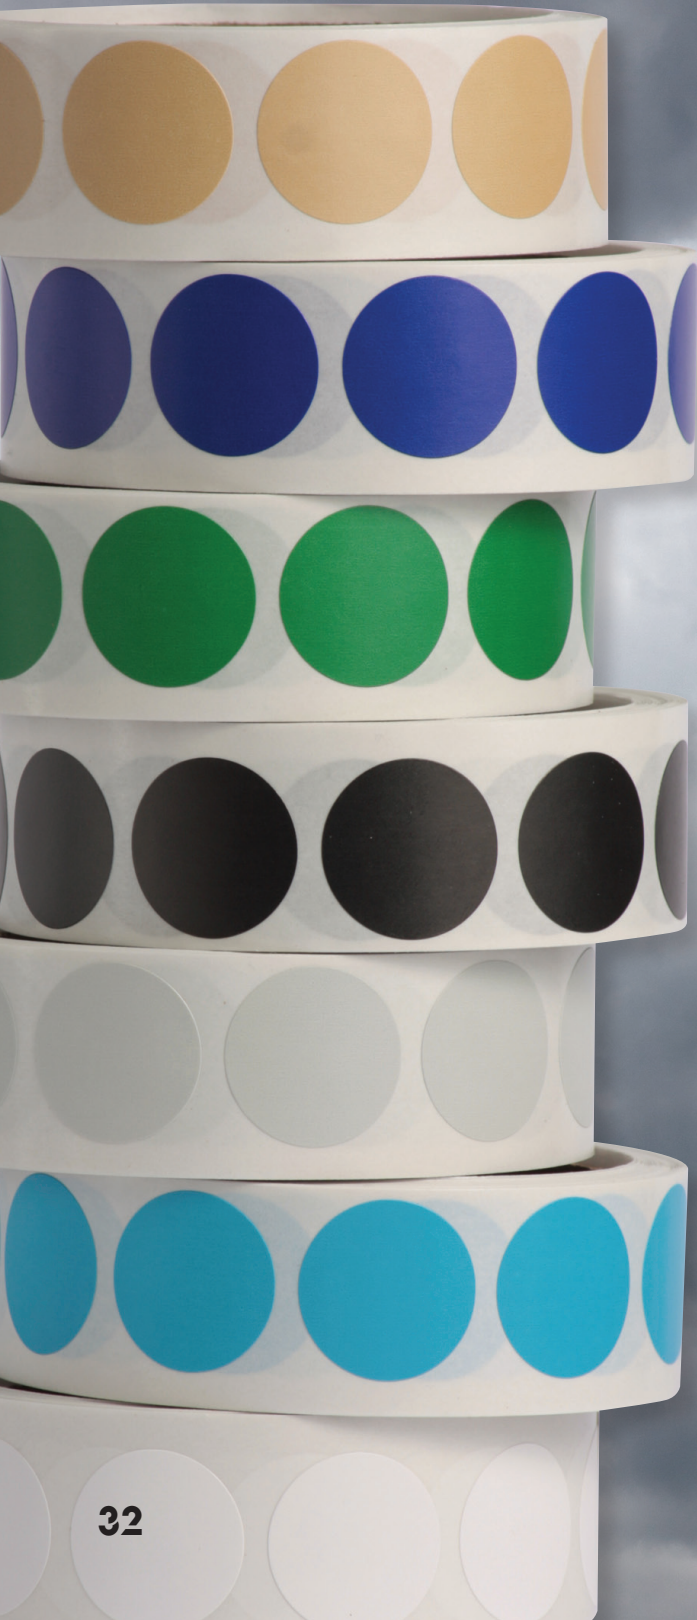

WE CAN DESIGN AND PRINT IT

- Targets Online is a target manufacturer, not a target reseller with a fulfillment warehouse
- We are a division of wStandard Printing Company, a quality printer since 1923
- Our management team has over 150 years of combined experience in the printing industry
- We listen to our customers and finds cost effective solutions for their needs
- Our on site design team can quickly convert your concepts into art work
- We consult with firearms experts to bring you the latest in target innovations

TARGET PASTERS

Our self-adhesive target pasters are 1" in rolls of 500. We currently stock them in white, black and five colors to match our most popular targets.

WHITE
 \$3.49 per roll of 500
 Part No. 7200001

BLACK

AIRSOFT CAPTURE TARGET

Our **AIRSOFT CAPTURE TARGET™** (Patent Pending) is a simple, yet revolutionary new target for airsoft pellets. The outside is made of corrugated cardboard soft enough for airsoft pellets to penetrate. Inside we added a much thicker and more dense piece of cardboard that the pellets do not penetrate. The result is that the airsoft pellets penetrate the outer layer, bounce off the inner layer and fall inside the target compartment. No more searching for and picking up stray pellets off the floor.

- **SOFT OUTER SHELL ALLOWS PELLET TO PENETRATE**
- **HARD INSERT STOPS PELLETS FOR CONTAINMENT**
- **EASY ASSEMBLY INSTRUCTIONS INSIDE PACKAGE**
- **BULLS EYES ON FRONT, ZOMBIE HEAD ON BACK**
- **EASY OPEN SPOUT FOR DISPOSAL OF PELLETS**

**AIRSOFT CAPTURE TARGET
(PACK OF 2)**
\$15.00
Part No. 7250302

**AIRSOFT CAPTURE TARGET
(PACK OF 3)**
\$18.00
Part No. 7250303

**AIRSOFT CAPTURE TARGET
(PACK OF 4)**
\$20.00
Part No. 7250304

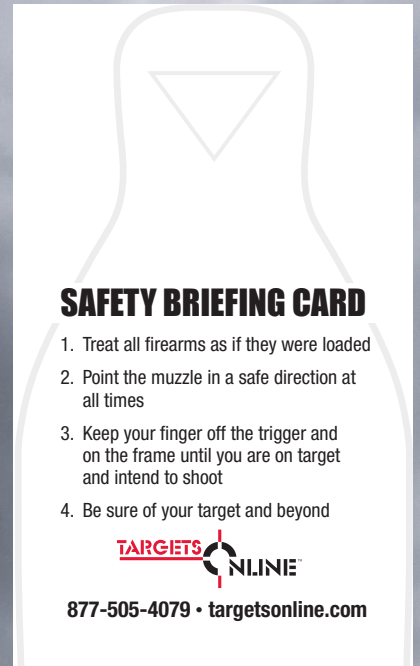

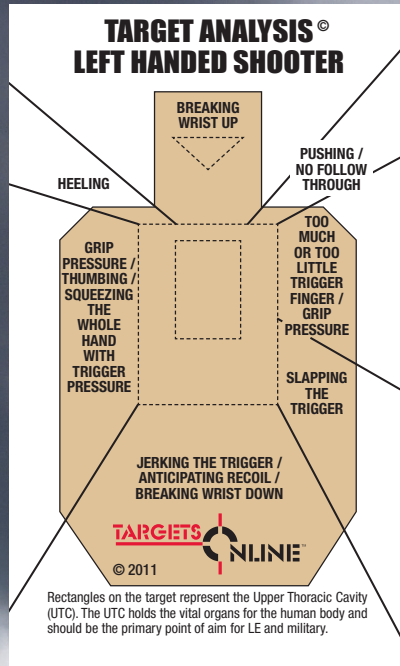

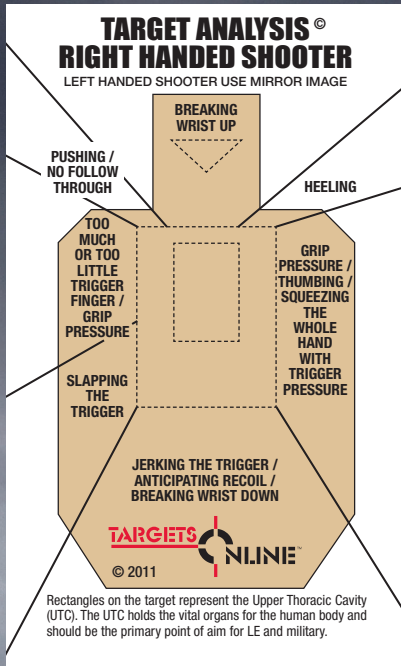

This product has been successfully tested with 6mm plastic airsoft pellets at the following velocities and distances:

- 265 – 300 fps at 10 feet
- 300 – 350 fps at 20 feet
- 350 – 400 fps at 20 feet
- 400 – 450 fps at 25 feet
- 450 – 500 fps at 35 feet
- 500 – 500 fps at 50 feet
- 550 – 600 fps at 80 feet
- Will not work in "Full Auto" Mode
- Will not work with low velocity guns sold by some big box retailers

IMPORTANT SAFETY PRECAUTIONS Always wear proper safety equipment. Treat all firearms as if they were loaded. Point the muzzle in a safe direction at all times. Keep your finger off the trigger and on the frame until you are on target and intend to shoot. Be sure of your target and beyond.
